

1 Binary mod_perl distributions

1.1 Description

This document includes links to various binary mod_perl distributions.

If you know about a distribution that isn't listed here, please tell us (by announcing it at the mod_perl list).

See also the source distributions and the bundles.

1.2 How to get pre-compiled mod_perl 1.0

1.2.1 Win32 build

Please see the section on Win32 mod_perl 1.0 binary distributions for details on getting all-in-one mod_perl 1.0 binary packages.

1.2.2 Win32 Active Perl

See the section on Win32 mod_perl 1.0 ppm packages for details on obtaining mod_perl 1.0 via ActivePerl's ppm utility, and Win32 mod_perl 2.0 ppm packages for the corresponding discussion for mod_perl 2.0 packages.

1.2.3 RedHat Linux

Static mod_perl and libapreq (Apache::Request) RPMs and SRPMs (made by David Harris) <http://www.davideous.com/modperlrpm/distrib/>. Mirrored at <http://perl.apache.org/rpm/>.

1.2.4 RedHat Linux (including php3)

i386 RPMs + SRPM (RedHat) of Apache with mod_perl and php3 built statically. (made by Vladimir Ivaschenko) <http://www.hazard.maks.net/apache/>

1.2.5 other OS

OS vendors may supply their own pre-compiled version of mod_perl. Refer to your OS vendor to figure out if they provide a binary version of mod_perl.

1.3 How to get pre-compiled mod_perl 2.0

1.3.1 Win32

Please see the section on Win32 mod_perl 2.0 binary distributions for details on getting all-in-one mod_perl 2.0 binary packages.

1.3.2 Fedora

<http://buscaluz.org/rpms/> (by Stuart Jansen)

Table of Contents:

1	Binary mod_perl distributions	1
1.1	Description	2
1.2	How to get pre-compiled mod_perl 1.0	2
1.2.1	Win32 build	2
1.2.2	Win32 Active Perl	2
1.2.3	RedHat Linux	2
1.2.4	RedHat Linux (including php3)	2
1.2.5	other OS	2
1.3	How to get pre-compiled mod_perl 2.0	2
1.3.1	Win32	2
1.3.2	Fedora	3
